## KEY FEATURES OF INNOVATION STAGE

- Dedicated platform to showcase your latest innovations
- Direct engagement with potential buyers and industry professionals
- Opportunity to demonstrate product features in real-time
- Increased visibility for your brand and offerings

## Building

- Sustainable Building Practices and Innovative Materials in Building with Green construction methods, Smart buildings and the integration of IoT, Intelligence Warehouse, Innovative Architectural Techniques and The future of construction materials.
- We will invite leading professionals who are experts in innovative building and architectural design to showcase groundbreaking developments that are shaping the future of the construction and architecture industries.

## IP Surveillance and AI

- IP Surveillance and AI solutions streamline security with centralized management, real-time analytics, and remote monitoring. They enhance efficiency and decision-making, essential for smart buildings and industrial sites.
- We invite IP Surveillance and AI providers to showcase their innovative solutions that improve security and safety management. Present your integrated platforms, AI-driven tools, or real-time monitoring systems to industry professionals and potential buyers.

## Smart Fire Safety & Rescue

- Safety and rescue solutions use advanced gear and technology to protect lives and reduce risk during emergencies. Smart fire solutions, powered by IoT and AI, enhance fire detection and response with smart detectors, thermal cameras, and real-time alerts. Together, they improve safety, readiness, and monitoring.
- We invite safety, rescue, and fire safety innovators to showcase their cutting-edge gear, rescue tools, smart detectors, and AI systems to industry professionals and buyers. Don't miss the chance to present your solutions to key decision-makers.

## Smart Home

- Today, we'll be delving into the latest advancements in connected living and working environments. This session provide a platform for you to demonstrate how your technology build up a more connected and secure future for home and offices.
- We invite exhibitors to showcase their latest products or solution at this session. Showcasing surveillance cameras, access control systems, innovative software and platforms, or a range of cutting-edge IoT products, present how your solutions help to build the home and office a more connected and safer place.
