The founders of ZKTeco Co., Limited (ZKTeco) since 1998 has been striving for the independent research and development of biometric verification algorithms and the productization of biometric verification SDK, which was initially widely applied in PC security and identity authentication fields. With the continuous enhancement of the development and a plenty of market applications, the team has gradually constructed identity authentication ecosystem and smart security ecosystem, which is based on biometric verification techniques. With years' experience of the foundation of the industrialization of biometric verifications, ZKTeco was officially established in 2007 and now has been a globally - leading enterprise in biometric verification profession, and has owned various patents and independent intellectual property rights, and has been selected as National High- tech Enterprise for consecutive 6 years.

## About Worldex G.E.C.

WORLDDEX GROUP OF COMPANIES has been operating since 1985, more than 30 years in cooperation with trade fair organizers around-the-world, being the biggest representative of international trade organizers in Asia and Europe to handle trade fairs and exhibitions worldwide. Moreover, we have affiliated companies and alliances in China, India, ASEAN region, and Europe.

Working closely with most of trade associations in Thailand, Worldex has played a linkage role to bind the associations and their members to the international market environment.

In addition, Worldex G.E.C. is one of the leading business events in Thailand including trade fair, seminar and special event, either as a show owner or co-organizer.

The company has sustained continuous success in running trade fairs and exhibitions both internationally and domestically.

For more information, please visit [www.worldexgroup.com](http://www.worldexgroup.com)

## Welcome to the 2018 edition of Secutech Thailand!

Running into its 6th edition, the show here in Bangkok provides a platform for stakeholders across the security, fire and safety and smart home and building sectors to network, source information and conduct business.

At this year's edition, the focus once again turns to smart city. As smart city solutions continue to be integrated in cities across Thailand, the need for regional buyers to sample and learn about the latest technologies is higher than ever before.

To highlight the torchbearers that are leading the way in this transition, the winner of the Smart City Champion 2018 competition will be announced during this year's fair. The competition shines a spotlight on smart city project proposals from city development contractors, system integrators, real estate developers, architects, consultancies and other analogous stakeholders. The competition is devised by the Digital Economy Promotion Agency (DEPA) and is held in collaboration with the Intelligent CCTV Association.

On the show floor, we are hosting a strong lineup of renowned international suppliers of solutions that are fit for the new era of security and automation. Among over 200 exhibiting brands from around the world are renowned companies Dahua, Full Enterprise, Great Lite, Hikvision, HIP Global, ICP DAS, JVCKenwood, Konica Minolta, Naffco and ZKTeco.

This year will also mark first appearances for country pavilions from Singapore and Taiwan. The former will focus on smart city with an array of IoT smart access control systems, AI-enhanced surveillance

systems, smart sensors and video smoke detectors. Meanwhile, the Taiwan Pavilion will present fairgoers with solutions for traffic control, smart living and emergency exits for fire safety.

In the smart home and smart building sectors, SMAhome Thailand returns this year with a host of smart IoT products. Telecom operators, real estate developers, hotel builders, construction companies and other sector stakeholders will be able to make business connections and learn about solutions for high-end residential complexes, buildings, smart offices and the hospitality industry.

With so much on offer, I am sure that all visitors to this year's fair will find the products, contacts, and information that they are looking for. I wish you all a successful time at the show!

**Mr Hubert Duh**

---

**Chairman and Managing Director  
Messe Frankfurt New Era  
Business Media Ltd**

## On behalf of Messe Frankfurt, welcome to the 2018 edition of Secutech Thailand.

With a portfolio of twelve trade fairs and events held across Asia, Europe, the Middle East and South America, Messe Frankfurt unites the growing safety, security and fire sectors in countries and regions around the world.

As an integral part of the portfolio, Secutech Thailand opens its doors again this year for international and domestic brands to display the security solutions that meet the unique requirements in the local market. This 6th edition will see the spotlight placed on Thailand's smart city, smart building and smart home sectors.

Demand for security solutions has been rising across these sectors and the Thai government's Eastern Economic Corridor (EEC) and smart city development projects have pushed up incentives for international security brands to invest in Thailand. New infrastructure and transportation projects are also pumping up needs for commercial security and fire safety products.

End users of these products have high technological requirements, particularly in the smart city sector, which is why we are glad to be welcoming international suppliers with strong technical prowess and global expertise to the show floor. Across 9,000 sqm of exhibition space, there are more than 200 brands exhibiting, representing a 10% increase from the previous edition.

Trade visitors are also forecasted to turn out in record numbers. In the previous edition some 8,300 professionals filtered through the fairground during the course of the show. Visitors are predict-

ed to come from all walks of the security industry, including distributors, importers, system integrators, government bodies, construction companies, industrial estate developers and many more.

I wish all of these visitors as well as exhibitors a productive few days of business, networking and information gathering at the show.

**Kerstin Horaczek**

Group Show Director,  
Messe Frankfurt

## On behalf of Worldex GEC,

I would like to welcome you all to the 2018 edition of Secutech Thailand. I am delighted to work with Messe Frankfurt New Era to co-organize this arousing exhibition Secutech Thailand 2018 which runs under the theme "Smart City – Safe City", the key phase for this edition.

The recent focus on smart cities in the country is all part of the government's Thailand 4.0 initiative. Thailand 4.0 is a new economic model that aims to transform Thailand into a high-income nation. Thailand have identified 10 S-curve industries that will propel the country to become a developed nation. The S-curve industries are divided into two categories – S-curve and New S-curve. As a leading industry event in the region, we strive to build smart and safety city development's awareness in Thailand. By collaborating with local authorities, leading local, ASEAN partners and international experts, the fair will be severally presenting the latest technology in many themes including Security, Fire & Safety, Smart Home and Info Security.

In addition to the theme zone, Security + AI = The Fundamental To Build A Smart & Safe City. Gathering leading brands to showcase security and AI innovations such as feasible business models, commercialised solutions, tangible applications and case studies, Secutech Thailand 2018 helps you build new partner networks and master the growing vertical markets of smart and safe cities development.

Beside the significant seminar, issues related to Fire&Safety in High-Rise building will also be addressed. Top management and experts from overseas and locals will gather to visit and attend Fire&Safety in High-Rise building seminars during the show dates.

Inclosing, I would like to express my grateful thanks to all the exhibitors and visitors again for your contribution and support to the great success of the International Trade Show. I wish all of you have a fruitful journey and achieve your business goal both during and after at the Secutech Thailand 2018!

**Mr. Nikom Lertmalligaporn,**

---

Chairman and Managing Director  
The president of Worldex G.E.C.

## Digital Economy Promotion Agency (DEPA)

The Premier Digital Economy Promotion Agency to Accelerate Transformation in Thailand

The Digital Economy Promotion Agency was established to promote and support the development of digital industry and innovation and the digital technology adoption in order to achieve the economic, social, cultural and security benefits in the national level in accordance with the Digital Development for Economy and Society Act

B.E. 2560 (A.D. 2017) promulgated on 23 January 2017, the 2nd year of the reign of King Rama X.

The Digital Economy Promotion Agency or DEPA has the following duties and authority;

- To prepare the digital economy promotion strategy in accordance with the national policy and plan regarding the digital development for economy and society.
- To promote and support the investment or business operation in relation to the digital industry and innovation.
- To promote, support and other public agencies or private companies to achieve the development of digital industry and innovation.
- To promote, support and implement the human resource development with regard to digital industry and innovation.
- To propose, accelerate and follow-up the law amendment or adjustment of regulations or measures in relation to the intellectual property protection of digital industry and innovation in collaboration with the relevant agencies.
- To conduct other duties as assigned by the National Committee for Digital Development for Economy and Society, specialized committee or the Executive Board of the Digital Economy Promotion Agency or as required by the laws.
- To make the agreement and cooperate with other international or domestic organizations or agencies of the governmental or private sector on the activities in relation to the implementation of the objectives of the Digital Economy Promotion Agency.
- To hold shares, be a partner or mutually invest with other person to achieve the objectives of the establishment of the Digital Economy Promotion Agency in accordance with the Digital Development for Economy and Society Act B.E. 2560 (A.D. 2017)

[www.depa.or.th](http://www.depa.or.th)

**Dr. Nuttapon Nimmanphatcharin**

President of Digital Economy  
Promotion Agency (DEPA)

## The Council of Engineers (COE)

The Council of Engineers (COE) is a statutory body under the Engineer Act, B.E. 2542 (1999). The professional engineering services in Thailand are regulated and controlled under the Act which is the central regulatory body for engineering services in Thailand.

### Mission

The Council of Engineers' obligation is to safeguard life, property and welfare of the public by setting high standard for registering and regulating professional engineers.

### Objectives

According to the Engineer Act, B.E. 2542, the Council of Engineers has the following objectives:

- (1) to promote the study, research and practice of the engineering profession;
- (2) to promote the unity among Members and conciliation of dispute among them;
- (3) to promote the welfare and maintain the honor of Members;
- (4) to supervise the conduct and practice of the Regulated Engineering Profession Practitioners in compliance with the standard and the Code of Ethics of the Engineering Profession;
- (5) to render assistance, suggestions and services to the general public and other organizations respecting technical matters concerning science and engineering technology;
- (6) to give advice or proposal concerning the policy and problems in engineering and technology to the Government;
- (7) to act as the representative of the engineering profession practitioners of the Kingdom of Thailand;
- (8) to perform other duties as specified in the ministerial regulations

[www.coe.or.th](http://www.coe.or.th)

**Dr. Kamol Tunkabut**

President of Council of Engineers  
(COE)

## Electronic Transactions Development Agency (ETDA)

The core organization to support SMART Thailand through promoting a secure growth in electronic transactions on a par with regional leaders

At present, electronic transactions play a vital role in the modern-day economy and in the country's economic growth. In this regard, it is necessary to develop, promote and support Thailand's electronic transactions; and provide an IT infrastructure which facilitates electronic transactions, helping businesses related to electronic transactions and creating secure, safe and reliable IT standards and communication. In order to achieve these objectives, set in line with the country's electronic transactions development goals at industrial entrepreneur, organization and people's levels, the Cabinet approved the establishment of the Electronic Transactions Development Agency (Public Organization), or ETDA, on 25 November, 2010. ETDA was set up under the Ministry of Information and Communication Technology (MICT) and according to the proposal of the Office of the Public Sector Development Commission (OPDC) to function as the main agency responsible for developing, promoting and supporting electronic transactions in order to create trust, opportunity and equity for all. ETDA's main mission is to conduct studies and research while providing support for the Electronic Transactions Commission and related agencies. Additionally, ETDA provides support to people's sector organizations which participate in the development, promotion and support of electronic transactions by establishing necessary infrastructure and advocating for an increase in volume and value of electronic transactions. It also provides technical services or other practical services related to Thailand's economic transactions.

### Mrs. Surangkana Wayuparb

Executive Director and CEO of Electronic  
Transactions Development Agency  
(Public Organization)

## The Federation of Thai Industries (F.T.I.)

สมาคมสหกรณ์แห่งประเทศไทย

The Centre for Leveraging Thailand's Industrial Development in the Global Arena

The Federation of Thai industries(F.T.I.) was established on 13 November, 1967, having been formerly known as The Association of Thai Industries(A.T.I.).It was founded by 27 founding industrialists who elected Mr.Thawee Bunyaket as the first President.

The logo of the A.T.I. was conceived for the first time for the registration of its by-laws with the Department of Commercial Registration, Ministry of Commerce under the Trade Association Act. It was a design made up of three moving cogwheels embracing the initials A-T-I which stands for the Association of Thai Industries. (Pronounced in Thai as Sor-Or.Thor. Its first office was located on Silom Road, Bangrak, Bangkok followed by several relocations afterwards. The latest move to the present site was made on 19 December 1995 which is Zone C,4th Floor,Queen Sirikit National Convention Centre, New Ratchadaphisek Road, Bangkok.

Over twenty years of its early life, the A.T.I. was able to fill many key roles which were well recognized by both government and private sectors. It was trusted to act as the representative of the Thai industrial businesses of the whole kingdom, including acting as the voice of the private sector component in the Joint Public Private Sectors Consultative Committee for Solving Economic Problems (JPPCC) chaired by the Prime Minister. On 28 December 1987 the government legislated "The Federation of Thai Industries Act,1987" which took effect at its printing in the Royal Gazette resulting in upgrading the former A.T.I. to F.T.I. – the Federation of Thai Industries(F.T.I.) which came under the supervision of the Ministry of Industry.

F.T.I. is the private sector administrative juristic person to serve as the core organization and also as the centre for all Thai industries in the kingdom. It is a non-profit organization with the main duties of promoting and supporting the industry focusing on both developing sustainable growth for all industrial operations in the country. F.T.I. is the core centre in the following four areas:

### Mr. Supant Mongkolsuthree

Chairman of the Federation of  
Thai Industries (FTI)

## National Housing Authority

In the first phase of residential development in Thailand, the government established the Housing Division, the Housing Office, the Government Housing Bank and the Bangkok Slum Improvement Office, and all of which aimed to resolve a shortage of residences for people, which the number had been increasing every year. However, this action was still unable to meet the public demand thoroughly because each of these organizations belonged to different jurisdictions. Therefore, in order to solve this problem of housing shortage, the government has established the National Housing Authority to directly serve the residential development as well as transferred some relevant duties and personnel to this organization. The National Housing Authority (NHA) is a state enterprise attached to the Ministry of Social Development and Human Security. It was established on February 12, 1973 in compliance with the National Executive Decree No. 316. It currently operates under the National Housing Authority Act (B.E. 2537), with the objectives to provide housing for low and middle income earners, to provide financial assistance to those who need to have their own housing, to deal with the business of building construction and land acquisition, and to upgrade, demolish or relocate slums in order to assist people in achieving better living, social and economic conditions.

**Dr. Thatchapol Kanchanakul**

Governor of National Housing Authority

## Thailand Convention & Exhibition Bureau

### Redefining Thailand's Business Event Landscape

The Thailand Bureau of Congresses and Exhibitions (TCEB) continues to shape the business events industry of Thailand with exceptional acumen and effective solutions. With a robust service support system and innovative approaches to co-create distinctive programs for the organisers, TCEB is redefining the MICE landscape to maintain Thailand's impact as a top Asian business destination.

Established by Royal Decree in 2002, the government agency is tasked with promoting and developing the business tourism sector in Thailand. Since 2004, TCEB has successfully established the country as Asia's largest business events hub, by providing amenable service support for MICE programs.

Today, TCEB is heeding the government's economic 'Thailand 4.0' policy, and targeting 10 key industries to align with international interests and be future-ready.

TCEB will be your reliable partner in all aspects of your business events in the Kingdom.

[www.tceb.or.th](http://www.tceb.or.th)

**Mr. Chiruit Isarangkun Na Ayuthaya**

President of Thailand Convention  
and Exhibition bureau

## Thai Intelligent CCTV Association (iCA)

Thai Intelligent CCTV Association is Established in 2013 by National Science and Technology Development Agency (NSTDA) to promote and support the CCTV Analytic development and Central platform creation and to push forward the policy in order to anticipate reducing import cost and customizing program properly.

The Smart society that creates a smart and safe city. We drive the CCTV service innovation toward Thailand 4.0 the value-based economy. The driver mechanism includes R&D, Standardization, a common platform, a policy guideline and a good teamwork.

**Dr. Thitapa Samitinon**

President of Intelligent CCTV  
Association (iCA)

## A Asia Pacific Security Association (APSA)

I am pleased to present APSA and Secutech Thailand 2018 bringing “The Fundamental to Build a Smart & Safe City”

Since its inception the Asian Pacific Security Association (APSA) has propelled itself as the leading professional association in the Asian region. APSA captivates an ever increasing enthusiasm through remarkable achievements, thanks to the candid unity and co-operation among its Chapter Associations namely, Thailand, India, Nepal, Philippines, Singapore, Malaysia, South Korea, Japan, Indonesia, China, Hong Kong , Macau and Vietnam . The formation of APSA today is seen as an impetus for further developments in the Protection Industry, and most importantly, its program for the benefit of safety and security sectors in Asia also promoted and support The Smart Police station project in Thailand in term of used technology to help to suppression of crime. Such as using face recognition technology and link to the data base from criminal records division to enhance Thai police becomes a smart police in Thailand 4.0 era.

We look forward to welcoming you to Secutech Thailand 2018 and sincerely hope that this show will deliver all a very successful experience of networking and business opportunities that will be generated from taking part in this show.

**Dr. Wallop Kingchasin**

President of The Asia Pacific Security Association (APSA)

## The Building Inspectors Association (BSA)

On behalf of The Building Inspectors Association (BSA) , I would like to welcome all participants to the region's most important security and fire safety exhibition.

Thailand is quickly developing its regulations and safety standards for building safety. It is consequently a huge market security and safety technology, especially with the upcoming infrastructure development projects; the ongoing safe city initiatives; the retail and industrial expansions; utility; hospital and educational security and the rapidly expanding residential and commercial developments.

Please mark in your calendars the dates of Secutech Thailand 2018: 8-10 November 2018, so that you may join us in what we hope will be master the growing vertical markets of smart and safe city developments in Thailand.

A handwritten signature in blue ink, consisting of a stylized 'W' followed by a flourish.

**Mr. Wasawat Kritsithirapak**

President of The Building Inspectors Association (BSA)

## Thai Security Association (TSA)

THAI SECURITY ASSOCIATION or TSA was established since 2012. The manufacturer and distributor of security system have seen a significant of security business. In addition, security business is also essential to help achieve social peace and more stability. Therefore, they gathered for founders TSA as a common goal to enhance security business success. Standardizing to security business and encourage further development to participate with various agencies of government. Moreover, it's including offer knowledge and technologies of security system to both TSA's members and other interested persons.

Currently president association is Mr. YANFENG YANG. He is a thinker and modern management person. Moreover, he has an experience of security system business management over 15 years. He has a vision to aim security business to sustainable growth. By his award are ASEAN COMMERCE AWARD 2012 and Thailand Leader Award 2015

[www.thaisecurity.org](http://www.thaisecurity.org)

**Mr. Tony Yang**

President Thai Security Association

# OVERVIEW | FLOORPLAN

The 6th Edition of Secutech Thailand being held from 8th – 10th November 2018, providing a platform for industry professionals in security, fire safety and smart home & building to contribute in the development of smart & safe cities. Concurrently held with Thailand Lighting & Building Fair, the show aims to bring together a large pool of related industry players into a one stop area to experience the highest quality in products, solutions and events.

## Secutech Thailand 2018

**200+**  
exhibiting  
brands

**250+**  
booths

**7,500m<sup>2</sup>**  
space

### 4 major themes:

- Intelligent security
- Smart home & building
- Fire & safety
- Cybersecurity

## Events

Visitors of the fair will have the opportunity to participate in a number of seminars and talks focusing on the market outlook of the industry and real-world case studies of projects involving the development of smart & safe cities

- Thailand Smart City Champion 2018
- Thailand Mayors' Summit
- The Challenge of Fire & Safety in High-Rise Buildings
- HOSAT Seminar 2018: Smart Hotel Solution Seminar
- IoT for Smart Property by Realtech
- SI Day: Innovation & Solutions Technology for Security Systems
- Thailand NB - IoT Eco System Summit
- Smart Police Station Concept for Digital Era
- Security & Safety for Digital Age

## Day 1 Event | 8<sup>th</sup> November 2018

Time	Venue	Event
10:00	Secutech Main Stage	INFO SECURITY FORUM
13:00	Center Stage	Opening Ceremony Secutech Thailand 2018
17:00	GH 203	ASEAN Networking Dinner*
18:30	GH 203	International Welcome Party*

*\*Admission by invitation only*

## Day 2 Event | 9<sup>th</sup> November 2018

Time	Venue	Event
10:00	Center Stage	Thailand Mayors' Summit
12:30	Center Stage	Official Launch of Intelligent CCTV Association
13:00	The Challenge of Fire & Safety in High-Rise Buildings	Secutech Main Stage

# SHOW INTRODUCTION

## secutech

THAILAND

October 2019

Thailand has been experiencing a fast increase in economic development over the last few years and it does not appear to be slowing down. The fast development also sees a rise in demand for a connected smart city using IoT and A.I to increase security, safety and general well-being. Secutech Thailand is the premier platform in security, fire safety and smart building & home for smart city development in Thailand. Industry professionals such as distributors, system integrators and solution providers will be able to meet their needs with the wide range of companies as well as participate in engaging seminars to learn about the latest trends.

---

## secutech

INDIA

25 – 27 April 2019

Advances in technology and a heightened demand for security measures in India increased the demand for advanced solutions in the fields of smart and safe cities, banking and finances, oil and gas, transportation and building management. Secutech India is the place for industry leaders, top brands and top buyers to come together and see the latest innovations and vertical solutions for the security and fire & safety

---

## secutech

International Security Expo

8 – 10 May 2019

Secutech, returns for its 22nd edition, is the largest regional business platform for professionals in the security, mobility, building automation and fire safety solution sectors looking for integrated security systems and smart solutions powered by AI analytics and IoT technologies. The seven thematic zones, including AI + Software, RFID Applications, LPWAN Applications, Smart Lock, Cybersecurity, Police equipment and Smart factory & Industrial safety, will showcase the most in-demand technologies and solutions. Intelligent Solutions Pavilions will also feature the latest smart security solutions in retail, factory, transportation, parking, healthcare, hotel and community sectors.

---

## secutech

VIETNAM

14 – 16 August 2019

Being one of the fastest growing market in Southeast Asia, Vietnam sees many infrastructure developments across the major cities. Increase in growth can be seen in various sectors including hospitality, residential and commercial with more demands for better technologies to compliment. Secutech Vietnam provides the platform for industry professionals in enterprise security, fire & safe and smart home & building to gather and exchange knowledge on the latest advancement in technologies.

---

powered by Secutech Thailand

SMAhome makes its second return to Thailand bringing the best in smart home & building products and solutions. First debuted in Taipei, SMAhome aims to give attendees a look into a connected settings in personal homes, offices and buildings. As IoT becomes more prominent across Thailand, companies will be showcasing a variety of smart technologies utilizing IoT to enhance the environment.

---

## fire & safety

powered by Secutech Thailand

Fire safety solutions and applications has always been one of the most important agenda for country development and government policy, in order to provide people a secure and safer living condition. Fire & Safety, powered by Secutech is organized concurrently with Secutech series in India, Taipei, Vietnam and Thailand as a prominent business hub for the experts and professionals to present their latest vertical solutions and innovations. With great support from both local and regional government officials and associations, Fire & Safety is the leading events of its kind in Asia.

---

## info security

powered by Secutech Thailand

Info Security is debuting this year at Secutech Thailand to bring the latest in cyber-security news and solutions. Topics that will be covered includes IoT security, mobile security, cloud security, network & endpoint security and risk remediation. Seminar sessions will be held to educate attendees on the best practices to enhance the strength of cyber-security.

## ICP DAS CO., LTD.

**Booth No.:** N21  
**Email:** service@icpdas.com  
**Tel:** 886-3-5973366  
**Fax:** 886-3-5973733  
**Address:** No. 111, Guangfu N. Rd., Hukou Township, Hsinchu, 30351 Taiwan

**Website:** www.icpdas.com  
**Business Nature:** Manufacturer  
**Product Category:** Building Automation/Home Automation, Security - Others, Home Automation & Controls, Energy & Lighting, Intelligent Building

ICP DAS was established in 1993, focuses on innovation and improving the industrial automation technology. With the wide spread of internet and the extension of household and entertainment, it becomes a trend to integrate data acquisition, industrial control, and communication as one complete system. The embedded-control system has also become the focal point of research and application.

**ICP DAS Power Management IoT Kit**  
Microsoft Azure IoT Starter Kit

**Features**

- Runs on browsers, no extra software tool is required.
- No more programming, user-friendly web pages are provided for building the IoT Cloud system.
- Ready-to-run Energy monitoring and management IoT Cloud solution includes an intelligent Power Meter, Concentration, a power meter, and Microsoft Azure service.
- Completed Application Scenario: the power consumption measurement, power demand management and alarm notification can be performed at the field-site, and the power data can be transferred to Microsoft Azure IoT platform for energy using analysis.
- Flexible integration with the power meter to measure the power consumption of the devices by Modbus protocol.
- Flexible power demand management, data logger and alarm notification functions at field site.
- Seamless integration with Microsoft Azure IoT service without programming.

**Application Scenario**

Clip-on CT to measure the power consumption of the devices.

Modbus RTU protocol

DO Relay Output

LED Indicator

MDR-20-24

Power Cable

Microsoft Azure

Skyfy Technology is a vehicle telematics company specializing in Fleet / Vehicle Management, Operation / Route Optimisation, Last Mile Logistics Management System, Waste Management System, IoT, and Sensors. Through significant investments in R&D, Skyfy Technology has congregated a solution which is optimum in the market. Skyfy has created a platform to leverage an ecosystem of sensors and devices which bridge the gap between the Cloud and our physical world. We enable companies to administer Big Data analytics to their newly gathered data, utilize Artificial Intelligence (AI) to streamline operations and track assets to participate in the sharing economy.

### VTS 12

Advance 3G tracker with internal high gain GNSS & 3G antennas.  
Internal backup battery

VTS 12 is light real-time tracking terminal with GNSS and 3G/GSM connectivity with backup battery, which is able to collect device coordinates and other useful data and transfer them via 3G/GSM network. This device is perfectly suitable for applications where location acquisition of remote objects is needed: fleet management, car rental companies, taxi companies, public transport, logistics companies, personal cars and so on.

### Features

#### 3G/GSM module

It makes it to device capable to operate as there are no other units that have only 2G network. Device automatically switches to backup battery (3G) to ensure the best connectivity in any

#### Wi-Fi

A Wi-Fi protocol support enables you to identify your location through Wi-Fi and connect to the Internet. Based on Wi-Fi access to provide geographical information to your fleet. Transferring various data you need to monitor and control your target.

#### GNSS reception support

With additional "External" vehicle GPS receiver you will be able to receive GPS data from any kind of transport such as light vehicles, boats, agriculture transport, and special transport. Supported vehicles list contains more than other models.

#### Easy Setup

Easy to set and setup definition gives you possibility to have the report with correct time, location and other data for each day.

#### Internal battery

It is safe when vehicle is disconnected by device with internal battery. When vehicle battery is disconnected, device still can receive and send data to server.

#### Internal high gain antennas

Internal GNSS and 3G antennas maximization space and better. Inside these units is also the internal antenna which has higher security against possible blind party signal.
